## Projects

### Event hub | React Js, Node Js, MongoDB, Express Js | [🔗](#)

January 2023

- A platform where all students can see the upcoming events and can register for the upcoming events
- All the clubs can post their upcoming events on the platform by Signing In.
- The clubs can update their events details after posting it using their dashboard
- The students can see the events highlight in the form of card and if they are interested they can see more details by clicking on the more details button and can register for event by clicking on register button.

### Code to Image | ReactJs, Styled-Components, Vercel | [🔗](#)

March 2023

- A product using which user can create beautiful snippets of their code. The product Code to Image was featured on Product Hunt and got 48 rank of the day [Product Hunt](#)
- User can create beautiful code snippets with customizable fonts, theme UI, background, can change width and padding of the snippet, can change the programming language type and can change the file name.
- Also user can select the dark mode and light mode for the snippet.
- User can download the snippet in different formats e.g PNG, JPEG, and SVG.

### ZipURL | Typescript, Next Js, Tailwind, Vercel | [🔗](#)

May 2023

- ZipURL helps users to make their urls short and user can also name their short url which makes url more understandable.
- User can make short url with few clicks and can name it to make it more readable. Also user can get analytics which shows that how many people have clicked the short url.
- User can also download the QR code of short link and if user want to delete his short url than that is possible too.

### Colour Codes | Next Js, Typescript, vercel, Tailwind, npm package | [🔗](#)

June 2023

- Colour Codes helps developers to get all types of colour codes such as Rgba, Rgb Hex, Hsla, Hsl and the nearest tailwind colour.
- Developer can download the [npm package](#) colour-codes using which devs can convert colour codes easily in their projects.

## Leadership / Extracurricular

### SIH(Smart India Hackathon) [🔗](#)

Sep 2023

Developer

PDEU

- We have made a web app AnuvadRatna which allow user to convert the english text into multiple regional languages e.g Hindi, Bengali, Telugu and more( We have made our own model and were not using third party apis for conversion).
- Also user are allowed to upload the resource in format such as pdf, text file which contain the english content and the app convert that whole file into selected regional language and can also download the translated file.
- Also we had a chat interface using which user can easily interact with the platform.

### SVNIT Hackathon [🔗](#)

March 2023

Developer

SVNIT

- We have made Hostel Room Allocation System we made the A platform where registered students can avail there room with ease with there friends.
- Eligible students have option to book room with random roommate or with their friend
- also student can see the current status of all rooms like we see the movie ticket status and student can identifies that which rooms are partially booked, fully booked and partially booked rooms by seeing the room status.
